1 DETAILED DATA DESCRIPTION

1.1 Format

Data are provided as GeoTIFF image files with associated TIFF world files (TFW) containing georeferencing information. GeoTIFF defines a set of publicly available TIFF tags that describe cartographic and geodetic information associated with TIFF images. GeoTIFF enables the referencing of a raster image to a known geodetic model or map projection. By using the GeoTIFF format, both metadata and image data can be encoded into the same file.

TFW files provide georeference information for the image with the same file name. Each TFW file is a text file with six numbers, described below:

Table 1 TFW Rows

Row	Description
1	the dimension of a pixel in map units in the x direction
2	rotation term for row
3	rotation term for column
4	the dimension of a pixel in map units in the y direction
5	x coordinate for upper left corner
6	y coordinate for upper left corner

1.2 File Naming Convention

Files are named according to the following convention:

TM5_MMDDYY.tifandTM5_MMDDYY.tfw

Example File Names: TM5_061104.tifandTM5_061104.tfw

Where:

MM	=	month
DD	=	day
YY	=	year

1.3 Spatial Coverage

Southernmost Latitude: 29.33 ° N

Northernmost Latitude: 32.69 ° N

Westernmost Longitude: 111.40 ° W

Easternmost Longitude: 108.56 ° W

1.3.1 Spatial Resolution

The Landsat TM data are high-resolution 30 m data.

1.3.2 Projection and Grid Description

Universal Transverse Mercator (UTM) Zone 12.

1.4 Temporal Coverage

11 June 2004, 29 July 2004, and 30 August 2004

1.5 Parameter or Variable

Infrared Imagery (Band 4)

Visible Imagery (Bands 2 and 3)

1.5.1 Parameter Description

Bands 2, 3, and 4 as blue, green, and red respectively are used to generate false color images that can be used to identify land cover and vegetation.

Table 2. Landsat Coverage Details

File Name	Date	Landsat Number	Path / Row
TM5_061104.tif	11 June 2004	5	35 / 38 for Arizona 35 / 39 for Sonora
TM5_072904.tif	29 July 2004	5	35 / 38 for Arizona 35 / 39 for Sonora
TM5_083004.tif	30 August 2004	5	35 / 38 for Arizona 35 / 39 for Sonora

1.5.2 Sample Data Record

Figure 1 is a false color sample image of the Arizona area, File Number: TM5_061104.tif.

Figure 1. False Color Sample Image of the Arizona Area

2 SOFTWARE AND TOOLS

A program which recognizes the GeoTIFF file format is recommended for these images.

4 CONTACTS AND ACKNOWLEDGMENTS

Thomas J. Jackson

USDA ARS Hydrology and Remote Sensing Lab
Beltsville, MD 20705
USA

Michael H. Cosh

USDA ARS Hydrology and Remote Sensing Lab
Beltsville, MD 20705
USA

Acknowledgments:

The investigators would like to acknowledge the following people: The many graduate students and volunteers who worked to collect the field data. The Soil Moisture Experiment 2004 Science Team, the Southwest Watershed Research Center (SWRC) with the USDA Agricultural Research Service (USDA-ARS) for their assistance. The National Aeronautics and Space Administration for their generous contributions to the study. This work was supported by the NASA Aqua AMSR, Terrestrial Hydrology and Global Water Cycle Programs.

5 DOCUMENT INFORMATION

5.1 Publication Date

1 May 2008

5.2 Date Last Updated
